

# Elisenda Vila

Fishing Boats was inspired by the Mediterranean Sea and its people. It shows a location in Croatia with fishing boats and fishermen. However, it represents more than one place. It represents all the people that live from the sea using traditional techniques for their job, and traditional values for their life.

Madeira was inspired by a trip that I took to Madeira many years ago. There I was fascinated by the orderly but at the same time savage nature. I found their traditional houses very charming, so I decided to paint one of them. I am a professional artist from Barcelona currently working and living in London. More information about my art and myself can be found at [www.elisendavila.net](http://www.elisendavila.net)
