

Nora van den Berg

I grew up in The Netherlands where I completed a BA in Fine Art Photography and New Media at the AKI ArtEZ Academy of Art & Design in Enschede.

After several months on an MA in Fine Arts, I felt a disconnection between my thinking and feeling which made me question my motivation to make art. Since then, I explored what creativity means to me and discovered the importance of free expressing without interruption of the intellect.

Now I experience how fruitful the interaction between conceptual and emotional expression can be, it allows me to integrate various layers in one artwork, whether it is in a photograph, painting, drawing or video.
